Subtotal	\$234.00
Tax	\$0.00
Total	\$234.00
Paid, Visa ending 3092	\$234.00

Examination notes

Powder presented bright, alert, and in good body condition for an active working dog. Heart and lungs were normal on auscultation, coat and skin were healthy, and dental condition was good for her age. Weight is appropriate for her frame and workload as a basic search and rescue dog.

Measure	Result	Reference
Weight	47 lb	Healthy for breed and frame
Temperature	101.4 F	Normal canine range
Heart rate	92 bpm	Normal at rest
Body condition	Ideal	Five of nine

Vaccinations were updated at this visit and the heartworm test was negative. Continue current diet and activity. Her conditioning from regular time in the mountains keeps her in strong shape.

Preventive care plan

- Next annual wellness visit due November 2026.
- Rabies booster current for three years, next due fall 2028.
- Continue monthly parasite prevention through the active season.
- Monitor paws and pads after long days on snow and rock, rinse and check for cracks.

Notes for the owner

Powder is healthy and at a good weight for her work as a basic search and rescue dog. Keep up the conditioning and the balanced diet. Call the front desk with any change in appetite, energy, or mobility, and we will fit her in. Thank you for trusting us with her care.

Payment received with thanks. This invoice is marked paid in full.
