Monthly payment due	\$340.00
Interest rate	3.45% APR
Approximate payments remaining	25
Autopay	Enabled from the linked checking account

Payment allocation

Each payment is applied first to accrued interest and then to principal. As the principal falls, more of each fixed payment goes to principal. The schedule below shows the next several payments on the current rate, for planning only, and may vary slightly with the payment date.

Remaining payment	Payment	Interest	Principal	Balance after
Next, due Feb 20, 2026	\$340.00	\$23.58	\$316.42	\$7,883.58
Following payment	\$340.00	\$22.67	\$317.33	\$7,566.25
Subsequent payment	\$340.00	\$21.75	\$318.25	\$7,248.00

The figures above are estimates based on the current annual percentage rate and a constant payment. Paying additional principal at any time reduces the total interest paid and shortens the term. There is no prepayment penalty on this account.
