

Teton Summit Resort Patrol

Annual Patrol Fitness Test Results

Administered by Snow King Fitness under the patrol contract.

Patroller	Jeff Peterson
Employee ID	TSR-0417
Test date	November 18, 2025
Result	Pass, exceeds standard
Cleared for	All toboggan and avalanche duty

Component results

Component	Standard	Jeff result
Loaded pack carry, 40 lb, 1 mile	Under 18 min	14:20
Toboggan haul drill	Complete	Complete, strong
Pull ups	8	16
Box step ups, 40 lb, 5 min	80	112
Plank hold	2:00	3:30
1.5 mile run	Under 12:00	9:48

Jeff cleared every component well above the minimum standard. The loaded pack carry and toboggan haul drill confirm readiness for the physical demands of avalanche and rescue work.

Why the test matters

Patrol work is physically demanding and often happens in poor conditions under time pressure. Carrying a loaded toboggan, breaking trail, and managing a rescue all require sustained strength and aerobic capacity. The annual test confirms each patroller can do the job safely.

Domain	What it measures	Notes
Carrying strength	Loaded carry and step ups	Toboggan and pack carries
Upper body	Pull ups and haul drill	Hauling and lifting
Core	Plank hold	Stability under load
Aerobic	1.5 mile run	Sustained effort at altitude

Snow King Fitness administers the test under contract and records results for the patrol office. Patrollers who fall short of a standard are given a plan and a retest window before the season.

Conditioning context

- Strength training three days a week focused on legs and core for carries.
- Ski touring well above fifteen thousand vertical feet per week in season.
- Trail running through the summer to hold aerobic capacity.

Reviewer comments

Jeff continues to set the bar for the patrol on the fitness test. He is cleared without restriction for all toboggan and avalanche duty. Next annual test is due November 2026. No follow up or retest is required this cycle.

Recorded for the patrol personnel file. Employee ID TSR-0417.
