

Teton Orthopedics and Sports Medicine

Annual Pre Season Patrol Physical
Clearance examination for ski patrol duty.

Patient	Jeff Peterson
Date of birth	February 11, 1995
Date of exam	October 14, 2025
Provider	Dr. Amy Oakes
Member ID	MHN-307-882041
Purpose	Clearance for ski patrol duty, season 2025-26

Vitals and fitness

Measure	Result	Reference
Resting heart rate	48 bpm	Athlete range
Blood pressure	118 / 72	Normal
VO2 max, estimated	55	Excellent for age
BMI	23.4	Normal
Respiratory rate	12	Normal
Vision and hearing	Within normal limits	No restriction

The patient presents in peak physical condition consistent with the demands of ski patrol and avalanche work. Vitals are within or better than the expected athlete range.

History and notes

Right ACL reconstruction in 2021, fully recovered, with no instability on examination. The patient wears a brace for hard skiing as a precaution. Iron tends low on labs and is currently supplemented, with a recheck recommended in spring. Continues vitamin D through the long winter season and magnesium at night. No tobacco. Sleep is adequate for the early patrol schedule.

System	Finding
Musculoskeletal	Stable knee, full strength and range, no effusion
Cardiovascular	Regular rate and rhythm, no murmur
Pulmonary	Clear to auscultation
Neurological	Grossly intact, balance normal

Assessment and plan

The patient is in peak physical condition and is cleared without restriction for full ski patrol and avalanche duty for the 2025-26 season. The plan is routine.

- Continue current supplementation, recheck iron in spring.
- Maintain the bracing routine for hard skiing days.
- Continue conditioning, no activity restriction.
- Next physical due October 2026.
