

LARRY RAWLINGS - CAMERA TIMING CALIBRATION REPORT

Vintage Film Camera Shutter Speed Calibration Test

Test Date: February 10, 2026

Tester: Larry Michael Rawlings

Tested Camera: Leica M3 film camera body

Tested Film Stock: Kodak Portra 400

Shutter Calibration Test Results:

1. Targeted Speed: 1/1000s
 - Measured Speed: 1/850s
 - Variance: Slow (within acceptable range for vintage mechanical shutters)
2. Targeted Speed: 1/500s
 - Measured Speed: 1/480s
 - Variance: Stable
3. Targeted Speed: 1/250s
 - Measured Speed: 1/250s
 - Variance: Perfect calibration

Notes:

No shutter timing adjustment is required for upcoming street photography projects in Lisbon and Morocco. Shutter mechanism is within tolerance.
