

# Small Business Innovation Grant - Progress Report

Grantee: Bayshore Sustainable Aquaculture | Program: Lonestar Foundation | Year 2 of 2

---

## Grant status

|                        |                                |
|------------------------|--------------------------------|
| Award                  | \$75,000 over two years        |
| Disbursed to date      | \$37,500                       |
| Remaining              | \$37,500 (disbursed quarterly) |
| Reporting period       | Q4 2026 (Oct - Dec)            |
| Quarterly disbursement | \$9,375                        |

## Milestones this period

- 1 Closed shrimp Cycle 1 at 78.6 percent survival and 1.58 FCR, ahead of the budgeted feed-conversion assumption.
- 2 Completed the biofilter maintenance schedule that cut the seasonal ammonia excursions to one minor event.
- 3 Stepped restaurant wholesale from four to five standing accounts; The Boathouse remains the anchor.
- 4 Advanced the oyster lease expansion narrative to draft for agency review.

## Funds use this period

| Category               | Budgeted | Actual  | Variance |
|------------------------|----------|---------|----------|
| Feed and inputs        | \$2,600  | \$2,410 | -\$190   |
| Energy                 | \$2,100  | \$1,980 | -\$120   |
| Equipment / biofilter  | \$1,400  | \$1,650 | +\$250   |
| Monitoring instruments | \$600    | \$540   | -\$60    |
| Total                  | \$6,700  | \$6,580 | -\$120   |

## Risks and outlook

The operation remains pre-profit in year two but is tracking toward the break-even target. The main risk is energy load on the chiller during heat events; the grant-funded blower redundancy mitigates the production risk. Next period focuses on the winter shrimp cycle and the year-end close.
