

Shop Plans - Bunk Bed and Kitchen Table

Workshop builds | Cottage furniture | Hand tools and a table saw

Cut lists and notes for two builds: the bunk bed for the second bedroom and the kitchen table. Simple joinery, solid wood, finished to take real use. Dimensions in inches.

Bunk bed - materials

Part	Qty	Material	Dimension
Posts	4	Doug fir 4x4	66 in.
Side rails	4	Doug fir 2x6	78 in.
End rails	4	Doug fir 2x6	42 in.
Slats	28	Pine 1x4	41 in.
Ladder rails	2	Doug fir 2x4	60 in.
Guard rail	2	Pine 1x4	48 in.

Bunk bed - notes

- Through-bolt the rails to the posts with barrel nuts so it knocks down to move.
- Round every edge a kid will hit; sand to 180 minimum.
- Guard rail on the top bunk is not optional. Anchor the ladder.
- Finish: two coats of hardwax oil, no fumes for the bedroom.

Kitchen table - materials

Part	Qty	Material	Dimension
Top boards	5	Ash or oak 1x6	72 in.
Breadboard ends	2	matching	38 in.
Legs	4	4x4	29 in.
Aprons (long)	2	1x4	62 in.
Aprons (short)	2	1x4	28 in.

Kitchen table - notes

Glue up the top in stages, alternate the grain to fight cupping. Mortise the aprons into the legs; draw-bore the tenons if you want it to outlive you. Leave the breadboard ends free to move with a slotted peg. Finish with oil and wax so spills wipe and scratches sand out instead of showing white.

Shop plans. Measure your own space before cutting; the cottage walls are not square.
