Progress External rotation strength improved to 4/5 with reduced painful arc. The copay runs about \$160.00 per week (~\$320/month) and is a standing line in the household health budget pending the surgery decision on November 5.

Plan of Care & Goals

Goal	Baseline	Current	Target
Pain (0–10) with overhead reach	6	3	0–1
Active abduction	135 deg	150 deg	165 deg
External rotation strength	3/5	4/5	5/5
Return to unrestricted duty	No	Pending	Yes

Home Exercise Program

- Resistance-band external rotation, 3 sets of 15, daily.
- Scaption below shoulder height, 3 sets of 12.
- Standing rows and scapular retraction, 3 sets of 12.
- Ice 15 minutes after fireground activity or coaching.

Authorization covers twelve visits through the current certification period; re-authorization or a post-operative protocol of roughly twelve weeks would follow the November surgery decision. Continued conservative management is appropriate while the operative decision is deferred.

Authorization & Referral

Care is provided under referral from Dr. James Reilly at HSS. The current authorization covers twelve visits through the certification period ending July 2026; re-authorization requires an updated referral. Copays are collected at each visit and total roughly \$320 per month across the two weekly sessions, a standing line in the household health budget alongside primary care, therapy, and insurance.
