

Podiatry Treatment Summary - Corey D. Holloway

Patient Information

Field	Value
Patient	Corey David Holloway DOB Nov 12 1965
Provider	Dr. Alan Richter DPM
Clinic	Folsom Foot and Ankle Folsom CA
Phone	916-555-0615
Diagnosis	Bilateral plantar fasciitis worse left foot
Onset	Early 2025; worsening spring 2025

Visit History

Date	Notes	Action
May 2025	Initial eval; bilateral PF confirmed via palpation	X-ray ordered; no calcaneal spur
Jun 2025	X-ray negative; conservative protocol started	Custom orthotics ordered; night splint prescribed
Aug 2025	Orthotics fitted; 40% morning pain reduction	Continue protocol; 2x daily stretching reinforced
Nov 2025	Mild improvement; night splint use intermittent	Running contraindicated indefinitely
Oct 2026	Follow-up NEEDS SCHEDULING	Review orthotics; assess cycling cleat alignment

Active Protocol

- Custom orthotics: wear in all footwear including cycling shoes.
- Stretching: calf and plantar fascia 2x daily; pre-ride and morning first steps.
- Night splint: recommended nightly; patient compliance intermittent.
- Activity: no running; cycling acceptable but monitor load.
- Fish oil 1200 mg daily for anti-inflammatory benefit approved.

Cleat Note

Patient cycling 400+ km per week. Cleat position adjusted to minimize forefoot stress. Float cleats recommended. Check at next visit October 2026.
