Provider	Steven Lam, MD
Visit type	Annual physical / preventive exam

Vitals

Blood pressure	Heart rate	Height	Weight	BMI
122/78	72 bpm	5 ft 7 in	155 lb	24.3

Assessment and Plan

- Borderline high cholesterol (total 215, LDL 138). Discussed diet; recommend reducing saturated fat and late-night eating, increasing activity. Recheck fasting lipid panel in about 12 months.
- Lower back pain, mechanical, related to long hours standing. Advised stretching and a supportive mat; over-the-counter analgesics as needed. Return if radiating pain or numbness.
- High occupational stress noted. Patient declines referral at this time.
- Lifestyle: works roughly 60 hours per week as a chef. Counseled on sleep timing and regular meals.

Follow-up: Schedule next annual physical and repeat lipid panel for October to November 2026. Dental care is overdue; advised to schedule a cleaning.
