Patient	Joyce Joseph Brandt
Date of birth	December 9, 1955
Medical record no.	ACH-0043912
Date of visit	January 22, 2026
Provider	Henry Polak, MD - Internal Medicine
Reason for visit	Three-month blood pressure and medication check

Thank you for coming in today, Mr. Brandt. This summary reviews what we discussed, today's measurements, your current medications, and your plan of care. Please keep it for your records and bring it to your next visit.

Vitals Recorded Today

Measurement	Result	Reference
Blood pressure	138/84 mmHg	Goal below 130/80
Heart rate	68 bpm	60 - 100
Weight	214 lb	-
Body mass index (BMI)	29.1	18.5 - 24.9
Temperature	98.4 F	97.0 - 99.0

Assessment

1. Essential hypertension - stable on current therapy. Blood pressure slightly above goal today; continue lisinopril and lifestyle measures.
2. Mixed hyperlipidemia - controlled on statin. Continue atorvastatin.
3. Bilateral knee osteoarthritis - followed by orthopedics (Three Rivers Orthopedics). Using OTC naproxen as needed.

Current Medications

Medication	Dose	Instructions	Prescriber
Lisinopril	10 mg	One tablet each morning	Henry Polak, MD
Atorvastatin	20 mg	One tablet at night	Henry Polak, MD
Naproxen (OTC)	220 mg	As needed for knee pain	Dr. Torrance
Vitamin D	2000 IU	Once daily	OTC / self
Fish oil	1000 mg	Once daily	OTC / self

Plan and Instructions

- Keep up your daily walking with Gloria.

- Watch your sodium; aim for lower-salt meals and limit processed foods.
- Check your home blood pressure twice weekly, in the morning before coffee, and keep a written log.
- Continue all current medications as listed above.
- Recheck in 3 months, sooner if home readings run high.
- Next annual physical: January 14, 2027.
