Re: Fourth quarter 2025 review and year-end planning, Bell Behavioral Health, LLC (S Corporation), EIN 82-4471936

Karen,

Here is the short version before our call. Your fourth quarter federal estimated payment of \$6,200 was scheduled for January 15, 2026. Florida has no personal income tax, so there is nothing at the state level on the individual side. Please confirm the payment cleared from the practice account.

On reasonable compensation, your W-2 salary of \$96,000 for the year continues to sit comfortably within a defensible range for a prescribing PMHNP and practice owner, with the remainder taken as distribution. We will not change that approach for the 2025 return. Your SEP-IRA contribution of \$15,000 for the year is confirmed and recorded.

To prepare the return, please send the December QuickBooks file, the year-end payroll summary from Gusto, and the 1098 mortgage interest statement once it arrives. The speaking income reported through your payment profile should reconcile against the deposits we discussed. If anything looks off against your own tracker, flag it and we will sort it before filing.

We will schedule the full review for late January. Call the office to set a time.

Sincerely,

Anthony Beaumont, CPA
