

American Avalanche Association

Professional Credential Recertification Notice

Continuing education cycle update for active members.

Member	Jeff Peterson
Credential	Avalanche Level 3, Professional
Certificate number	A3-WY-1188
Employer	Teton Summit Resort
Member region	Northern Rockies, Wyoming
Notice date	February 5, 2026

Recertification overview

Your Avalanche Level 3 professional credential requires ongoing continuing education to remain current. The credential confirms the holder can lead avalanche forecasting and mitigation work, author public hazard products, and supervise control operations. Our records show the following progress toward your active cycle.

Requirement	Detail	Status
Continuing education units	24 required per cycle	18 logged
Professional development workshop	Regional snow science session	Complete, fall 2025
Annual refresher	Pit standards and rescue	Complete, November 2025
Units remaining	Needed before deadline	6
Recertification deadline	November 30, 2026	
Cycle length	Three years	
Current cycle began	December 2023	

How to log the remaining units

Six units remain. The following activities qualify and can be self reported through the member portal with supporting documentation. Most members in an operational role complete the balance through ordinary season work.

Qualifying activity	Units	Documentation
Authoring the daily resort hazard advisory	Up to 4	Sample advisories, supervisor sign off
Instructing public Avalanche Level 1 courses	Up to 4	Course roster and dates
Attending a regional snow and avalanche workshop	2 to 6	Certificate of attendance
Publishing a field observation or case study	2	Copy of the published item

Authoring the resort daily advisory and instructing Avalanche Level 1 courses both qualify and together are expected to close your remaining balance well before the deadline. Units logged after the deadline apply to the next cycle and cannot backfill a lapsed credential.

Member standing and benefits

- Active professional members receive the quarterly journal and member advisories.
- Professional listing in the certified forecaster directory remains active while current.
- Reduced registration at the regional and national snow science workshops.
- Eligibility to mentor and to proctor Level 1 and Level 2 course candidates.

Questions

Direct questions about your cycle to your section representative for the Northern Rockies, or to the credentialing office through the member portal. Please reference certificate number A3-WY-1188 in any correspondence so we can locate your record quickly.

This notice is informational and does not by itself renew or suspend your credential. Renewal is processed once the required units are logged and verified.
