Service summary for the period

The table below summarizes connection performance for the billing period. Residential service is best effort and speeds vary with weather, obstructions, and network demand in the cell.

Metric	This period	Prior period
Average download	138 Mbps	142 Mbps
Average upload	16 Mbps	15 Mbps
Median latency	41 ms	44 ms
Service uptime	99.3%	98.9%
Data used	412 GB	388 GB

A brief outage was recorded during a heavy snow band midmonth. Clearing accumulated snow from the dish restored full service. The optional snow melt setting on the dish is enabled for the winter season.
