

United States v. Delacroix

Wiretap-Transcript Discovery Summary

DRAFT - NOT COURT-READY

Prepared by: Devon Harris, Associate

Matter: US v. Delacroix (EDLA) Drafted: 16 October 2026

Status: outstanding, citations not reconciled. Hold - do not file or
send to the court until the index reconciles clean.

1. Scope

Sessions S01 through S20 of the produced wiretap material have been summarised. The substantive exchanges relied on in this narrative are carried by the following intercepted calls, each transcribed and reviewed:

CALL-0003, CALL-0019, CALL-0044, CALL-0061,
CALL-0088, CALL-0112, CALL-0150, CALL-0177

2. Corroborating material

The narrative additionally relies on CALL-0206 for the corroborating exchange on the later session.

*(Note for reconciliation: this citation has not been matched
back to an intake row.)*

3. Outstanding

Two sessions remain not yet fully reconciled against the intake index. This summary is held until those are squared. Nothing in this document should be represented to the court as final.

4. Proposed exhibit list for filing

The following exhibits are proposed for the conference filing. Each maps to an intercepted call in the produced material:

Exhibit	Call
EX-009	CALL-0044
EX-018	CALL-0112
EX-099	CALL-0193
EX-022	CALL-0177

EX-099 corresponds to CALL-0193.

(Reconciliation flag: CALL-0193 is not marked verified in the tracker.)

5. Notes to file

16 Oct, 13:40 - we are clear on transcripts now; the summary is clean for review and reconciles to the index, nothing outstanding on the wiretap side. [Devon]

16 Oct, 13:05 (earlier, same day) - still outstanding; two sessions not yet reconciled against the index, holding before anything goes to the court. [Devon]

No signatures. Draft circulated internally for Ralph's review.
