

## CONFERENCE-AND-RESEARCH READINESS BRIEF

Fritz Rush - October 8 through October 22, 2026 fortnight

Prepared for morning-of review. Prioritized. Every open item names owner and next-action.

### AT A GLANCE

**LOCKED:** Reconciled RTS,S numbers packet, three-deck figure alignment, Fellow Research Day deck (Oct 8), IDWeek short-talk deck, CHOA Grand Rounds deck, CME year-end position (53.5 credible against 50 floor), consulting Schedule C YTD reconciliation, household continuity plan with Diane and Rebecca.

**OPEN:** Kilifi site open-conclusion resolution attempt, R21 reviewer-response memo awaiting Kevin sit-down at IDWeek, DC travel and lodging staged and held for Fritz yes (\$1,325 combined at threshold), 7 faculty outreach drafts held for approval.

**AT RISK:** Kilifi WhatsApp sync must happen before Oct 15 departure or the poster carries an unnecessarily wide open-conclusion range. Grand Rounds slide 14 confidence interval decision needs Kevin sign-off after IDWeek returns.

### 1. RTS,S NUMBERS STATUS

Reconciled numbers packet is locked. Four of five sites are locked. Kilifi carries an open conclusion because the encounter count (815) and partner sign-off (782) disagree by 33 doses. Aggregate weighted coverage is 77.2 percent across 4,382 enrolled encounters. Aggregate coverage-adjusted illness averted point estimate is 380 clinical malaria cases with a range of 361 to 401 accounting for the Kilifi open conclusion.

Sources trusted: Dropbox raw pipeline export dated Sept 28 for encounter counts, Salesforce partner sign-off for delivered doses, Jira delivery ticket JIRA-RTSS-Amend04 for the newest ethics-amendment coverage figures. Sources set aside: Confluence protocol page v3.2 (predates

Amendment 4), Slack pinned message from May (obsolete), Airtable manuscript pipeline row 17 (stale August snapshot).

Next action: WhatsApp sync with Kilifi field coordinator before Oct 15 departure. Owner: Fritz.

## 2. THREE-DECK STATUS

Fellow Research Day deck (Oct 8) - LOCKED. Internal fellowship audience, preliminary tone acknowledged. Uses reconciled figures from packet.

IDWeek poster (Oct 15-19) - LOCKED. Same figure set as short talk. Waiting on Fritz yes for the print vendor (\$189, held C6 in queue).

IDWeek short-talk deck (Oct 17) - LOCKED. 12-minute talk plus 3-minute Q&A. Same figure set.

CHOA Grand Rounds deck (Oct 22) - LOCKED except for slide 14 confidence interval decision and slide 21 per-site sensitivity table. Both held for Kevin sign-off after IDWeek returns.

Shared figure set verification: complete. No same-site figure drifts across the three artifacts. Kilifi appears with the same open-conclusion range everywhere.

Next action: confirm Grand Rounds slides 14 and 21 with Kevin after IDWeek.

## 3. R21 STATUS

NIAID summary statement received Oct 2. Reviewer comments mapped to aims and sections. Response memo drafted in r21\_reviewer\_response\_draft.docx with track-changes on. Held for Kevin sit-down at IDWeek Oct 16. Do not send anything to the study section without Kevin sign-off. Do not preview R21 direction on the WordPress blog or any public feed.

Next action: Kevin sit-down at IDWeek, Convention Center Room 208A, Oct 16 5:30 PM.

## 4. DC TRIP STATUS

Flight ATL to DCA Oct 15 07:35 departure, DCA to ATL Oct 19 17:20 return, main cabin aisle. Staged at \$412.60, HELD C1 in queue.

Lodging Mt Vernon Sq loft, three-block walk to Walter E. Washington Convention Center, four nights at \$187 per night for \$748 total. Staged, HELD C2.

Ground transit round-trip Uber approximately \$164 cumulative, HELD C3.

Sunday call from DC hotel: Oct 18 at 10:00 AM Eastern to Florence. Hotel room is quiet enough. Non-negotiable calendar hold.

Next action: Fritz yes on C1, C2, C3 to enable auto-book.

## 5. NETWORKING CALENDAR STATUS

Seven target chairs identified from Greenhouse faculty tracker, cross-referenced against IDWeek attendee list. Meeting windows blocked in the ICS calendar. Personalized outreach drafts held in idweek\_outreach\_drafts.md.

All seven are new contacts. AGENTS.md new-contact rule binds. Nothing sends without Fritz explicit yes.

Next action: Fritz reviews the seven drafts and gives yes/no per target.

## 6. CME STATUS

YTD audited: 25 claimed, 23.5 audit-survivable, 1.5 on hold pending certificates. Projected credible additions from the fortnight: 30 credits. Best-case year-end: 58. Worst-case year-end: 53.5. December floor: 50. Margin is comfortable even without chasing the missing Malaria Consortium webinar certificate.

Next action: chase 2026-05-10 Malaria Consortium certificate opportunistically, no urgency.

## 7. CONSULTING SCHEDULE C STATUS

Reconciled gross consulting income YTD: \$14,845. Xero XR-INV-0146 set aside as a duplicate of the WHO Geneva virtual session moderation line. QuickBooks and Stripe agree. YTD deductible expenses: \$1,179 consulting-portion. Estimated IDWeek DC trip consulting-portion: \$658 subject to final receipts after Oct 19 return. Schedule C net YTD indicative: \$13,666.

Next action: finalize IDWeek receipts and consulting-portion split after Oct 19.

## 8. HOUSEHOLD CONTINUITY STATUS

Daycare pickup coverage locked with Diane (Oct 15, 17, 19 evenings) and Rebecca (Oct 16 evening, Oct 18 afternoon). Groceries staged in Instacart under threshold, delivery Oct 14 evening. Sunday call from DC hotel scheduled. Wednesday Oct 15 choir rehearsal marked as absent, choir-director text drafted. Carter map artifact prepared. Pre-dawn run route on the greenway for home mornings, vetted DC route (National Mall loop) for away mornings.

Next action: send G1 through G5 texts after Fritz approval.

## WHAT I WOULD DO NEXT IN YOUR SHOES

One: approve C1, C2, C3 travel bookings by end of Oct 8 so the flight fare does not drift up. Two: fire the WhatsApp sync to the Kilifi field coordinator so the poster range can tighten before print. Three: read the seven networking drafts on the pre-dawn run break before choir Wednesday and give yes/no per target so the calendar invitations can go out with lead time. Everything else can wait for the Kevin sit-down at IDWeek.
