

Autumn General Meeting - Members' Pack

Cooperativa Oleicola Sierra Morena - Baena cooperative hall - 22 October 2026

Meeting	Autumn general	Members	small + mid producers
Date	2026-10-22, 17:00	Quorum	per statutes
Venue	Cooperative hall, Baena	Papers	this pack
President	Isabel Morales	Prepared for	Min Miles Park

1. Agenda

#	Item	Lead
1	Welcome and quorum	President
2	Minutes of the spring meeting	Secretary
3	2026-27 harvest projections	Technical committee
4	Organic subsidy review	President
5	Pool price mechanism and advances	Treasurer
6	Mill scheduling for peak harvest	Mill manager
7	Any other business	Floor
8	Date of next meeting	President

2. Harvest projections (2026-27)

The technical committee projects a harvest broadly in line with a normal year, subject to the autumn rains. Members are asked to submit estimated tonnage by parcel so the mill can schedule pressing slots and avoid the queue delays seen at peak last season.

3. Organic subsidy review

With several members (including this estate) carrying parcels through organic conversion, the meeting will review the cooperative's position on organic subsidies and the documentation the cooperative can centralise to lighten each member's audit load. The estate's east-grove conversion completes at the spring 2027 inspection.

4. Pool price and advances

Item	Position
Provisional pool price	EUR ~4.30 / L (indicative)
Harvest advance	per litre on delivery
Final settlement	after season close and sales
Quality differential	premium for low-acidity lots

This estate pooled approximately 4,690 litres last season (**about 40%** of output); see the pool settlement workbook (X07) for the member's own position.

5. Small-producer matters

- Continued advocacy for small and mid producers in pricing and mill access.
- Shared logistics for input purchasing to lower per-member cost.
- Group representation on regional water and subsidy consultations.

6. Mill scheduling

To protect oil quality, fruit should be milled within 24 hours of picking. The mill will publish pressing slots by member and parcel; members converting to organic require segregated press runs, which the schedule will accommodate by grouping organic deliveries.

7. Motions and voting

Motion	Proposer	Vote
Adopt centralised organic documentation support	Board	for / against
Confirm pool advance rate	Treasurer	for / against
Approve mill schedule policy	Mill manager	for / against

8. Member notes (this estate)

- Submit 2026-27 tonnage estimate by parcel before the meeting.
- Raise segregated-press scheduling for east-grove organic fruit.
- Confirm dues current (see X07); cooperative dues paid monthly.
- Watch cooperative politics - provide information, navigate relationships personally.

9. This estate's position (reference)

Metric	Value
Oil produced (season)	11,812 L
Pooled (~60%)	4,690 L
Premium / single-estate	~40% retained
Dues	EUR 150 / month, current
Organic parcels	E-1, E-2, E-3 (cert spring 2027)

10. Glossary for members

- Pool price - provisional EUR/L paid for pooled oil, settled after season close.
- Segregated press - separate mill run keeping organic-transition fruit apart.
- Maturity index - ripeness scale guiding harvest timing and oil style.
- Copper ceiling - EU annual limit (4.0 kg Cu/ha) on organic parcels.

11. Practicalities

- Bring this pack and any tonnage estimate.
- Proxy voting per the cooperative statutes if unable to attend.
- Next meeting date confirmed under agenda item 8.
- Questions to the secretary in advance where possible.

Members' pack prepared for Min Miles Park. Cooperative data: workbook X07.
