## Current Medication List - Reconciliation

Patient **Hung Pham**  
Date **September 22, 2026**

DOB **August 8, 1958**  
Pharmacy **CVS - Cary, NC**

Reviewed by **Dr. James Morrison**  
Allergies **Sulfa antibiotics**

### Medication Change - Effective September 22, 2026

**Diltiazem 180mg ER has replaced Metoprolol 50mg.** Reason: better rate control needed, persistent bradycardia on metoprolol. **STOP Metoprolol immediately - do not take both.**

## ACTIVE MEDICATIONS

| # | Medication         | Strength  | Directions                      | Indication                   |

|-----------------------|---------------------------|
| <b>Next visit</b>     | November 15, 2026         |
| <b>Provider</b>       | Dr. James Morrison        |
| <b>EKG monitoring</b> | Repeat in 4 weeks         |
| <b>Purpose</b>        | Assess diltiazem response |

## NOTES FOR FAMILY

- STOP Metoprolol immediately. Do not take both.
- Diltiazem may cause dizziness for the first 1-2 weeks. This is normal.
- Continue all other medications unchanged.
- Angela (daughter) is listed as emergency contact and medication coordinator.
