

Migraine Tracking Log & Acute Medication Diary

Patient **Angela Pham**
Rx # **CVS-7749-2026-ST**

Prescriber **Dr. Sarah Park**
Refills **4 of 6**

Medication **Sumatriptan 50mg PRN**
Pharmacy **CVS - Cary, NC**

Preventive Threshold

Monthly usage of **5 doses triggers an Aimovig preventive review**. Track every acute dose carefully against the rolling window.

SEPTEMBER USAGE (REFERENCE)

Date	Dose	Trigger	Outcome
Sep 5	1 dose - 50mg	Work stress	Resolved in 2 hrs
Sep 18	1 dose - 50mg	Weather pressure	Resolved
Sep 27	1 dose - 50mg	Late night + screen fatigue	Resolved
Total September	3 doses		Below threshold

OCTOBER USAGE (AS OF OCT 1)

Dose	Date / Time	Notes	Counts toward
Dose 1	Sep 30 late PM / Oct 1 early AM	Unclear which day to count	Ambiguous
Dose 2	Oct 1 afternoon (3 PM)	Did not fully resolve	October

Patient Note - Count Ambiguity

"I think I took one more around Sep 28-29 but I am not 100% sure if that was the one already logged on Sep 27 or a separate dose. If it was separate, that puts me at **4** for the rolling 2-week window."

Current rolling 2-week count: 3 confirmed, possibly 4. If the count reaches **5** in any calendar month, schedule an Aimovig evaluation.

Bring this diary to your neurology follow-up. Note aura, duration, and response for each event where possible.
