Vital Signs and Measurements

Measure	Value	Note
Height	5 ft 11 in	
Weight	165 lb	Stable from last year
Body Mass Index	23.0	Normal
Blood Pressure	112/68 mmHg	Normal
Resting Heart Rate	48 bpm	Athletic bradycardia, expected
VO2 max (lab estimate)	58 mL/kg/min	Elite endurance range

Assessment

Healthy 22 year old competitive endurance athlete in excellent cardiovascular condition. Active concerns reviewed below.

- **Iron depletion tendency:** continue ferrous sulfate 325 mg daily, iron studies rechecked separately, recheck in 6 months.
- **Chronic right shin splints:** stable, managed with compression sleeves, ice, and surface rotation. Continue care with sports physical therapy.
- **Anxiety, high-functioning:** managed through routine and exercise. Counseling Center contact reviewed and available if needed.

Plan

Continue current training and supplementation. Routine labs and physical in one year. Immunizations current, including annual influenza given today. No new medications.
