

Statement of Work

This Statement of Work sets out the engagement between Brock Leadership Group LLC and Hawthorne Industries for a leadership team assessment and development program. It describes the objectives, the scope of each phase, the schedule, the fees, and the terms that govern the work.

Client	Hawthorne Industries
Client lead	Julia Reyes, Human Resources Lead
Site	Earth City, Missouri
Term	September 1, 2025 to February 28, 2026
Total fee	48,000 dollars
Schedule	Four installments of 12,000 dollars

1. Background and Objectives

Hawthorne Industries has asked Brock Leadership Group to assess and strengthen the effectiveness of its senior leadership group. The objective is to give the group a shared, evidence based picture of how it works together, to surface the few behaviors that most limit performance, and to build the habits that raise the quality of decisions under pressure. The program treats psychological safety as a measurable condition for performance and ties every recommendation to a behavior leaders can practice.

2. Scope of Work

The engagement runs in three phases. Each phase has a defined output, and the client lead reviews progress at the close of each phase before the next begins.

Phase one, assessment. Individual Hogan profiles for nine leaders and a team level psychological safety diagnostic, followed by structured interviews and a written findings report that summarizes patterns at the group level.

Phase two, development. Six facilitated sessions that target the priorities surfaced in phase one. Sessions combine short input, practice, and live application to current business decisions.

Phase three, measurement. A ninety day rerun of the diagnostic and a closing report to the HR lead that documents the change and recommends next steps.

3. Deliverables

Phase	Deliverable	Due
Assessment	Nine Hogan profiles and a team diagnostic	End of month 2
Assessment	Written findings report at group level	End of month 2
Development	Six facilitated sessions	Months 3 to 5
Measurement	Ninety day diagnostic rerun	Month 6
Measurement	Closing report with recommendations	End of month 6

4. Schedule and Fees

The term runs from September 1, 2025 to February 28, 2026. The total fee is 48,000 dollars, billed in four equal installments of 12,000 dollars. Travel to the Earth City site is billed at cost and itemized on each invoice. Invoices are due within 30 days of receipt.

Installment	Amount	Billing point
First	12,000 dollars	On commencement
Second	12,000 dollars	On delivery of findings report
Third	12,000 dollars	Midway through development sessions
Fourth	12,000 dollars	On delivery of closing report
Total	48,000 dollars	

5. Roles and Responsibilities

Brock Leadership Group provides all assessment instruments, facilitation, analysis, and reporting. Hawthorne Industries provides scheduling access to the nine leaders, a suitable room for on site sessions, and the engagement and error data needed to ground the diagnostic. The client lead, Julia Reyes, is the single point of contact for approvals and scheduling.

6. Confidentiality

Individual assessment results are released only to each leader. The client receives findings at the team level so that no individual profile is identifiable. All instruments, frameworks, and materials remain the property of Brock Leadership Group until the engagement is paid in full, after which the client retains the right to use the delivered reports internally.

7. Change Control

Either party may request a change to scope, schedule, or fees. Changes take effect only when both parties agree in writing. Added work beyond the scope described here will be quoted before it begins.

8. Term and Termination

Either party may end the engagement with 30 days written notice. On termination the client pays for work completed and for any nonrefundable commitments made on the client's behalf. Sections on confidentiality and ownership survive termination.

Appendix A. Assessment Methodology

The assessment combines validated instruments with structured interviews and a team level diagnostic. Individual Hogan profiles describe how each leader is likely to lead day to day, what may derail performance under stress, and the values that drive decisions. The team diagnostic measures the conditions that determine whether members speak up, raise risks, and admit mistakes. Interviews add context that the instruments alone cannot capture.

Instrument	What it measures
Hogan profile	Day to day style, derailers, and driving values
Safety diagnostic	Team conditions for candor and challenge
Structured interview	Context, history, and current pressures

Appendix B. Measurement Plan

Progress is measured by rerunning the team diagnostic ninety days after the development sessions and comparing the result against the baseline taken in phase one. The closing report documents the change, names the behaviors that moved the result, and recommends where to focus next. Success is defined as a measurable rise in candor indicators and in the rate of concerns raised before decisions are made.

Metric	Baseline	Target at ninety days
Safety diagnostic score	Phase one reading	Measurable improvement
Concerns raised per decision	Phase one reading	Higher than baseline
Leader behaviors practiced	Zero established	Two per leader, sustained

Agreed for the Client	Agreed for the Consultant
