After Visit Summary

Patient: Amanda Hayes
DOB: 01/19/1985 Age: 41
MRN: SFM-204418
Provider: Nathan Gibbs, MD
Visit Date: February 11, 2026
Visit Type: Annual physical

VITALS

Height: 5 ft 7 in Weight: 152 lb BMI: 23.8
Blood Pressure: 118/74 Heart Rate: 62 Temp: 98.4 F

CURRENT CONCERNS

Chronic low back pain from a known L4-L5 disc herniation, managed with a daily core routine, standing desk, and ibuprofen during flares. Reports two to three flares per month, usually after long sitting. No new radicular symptoms.

ASSESSMENT

1. Chronic low back pain, stable, conservative management appropriate.
2. Health maintenance, up to date.
3. Mild stress and off-week sleep disruption, already in therapy with Dr. Holloway.

PLAN

- Continue home exercise program and standing desk.
- Ibuprofen as needed for flares, not to exceed label limits.
- Continue vitamin D, magnesium glycinate, and fish oil.
- Labs ordered: comprehensive metabolic panel and lipid panel (see results).
- Routine screening labs reviewed, all within normal limits.
- Return in one year or sooner if back symptoms change.

MEDICATIONS AND SUPPLEMENTS

Ibuprofen 400 mg as needed; Vitamin D 2000 IU daily; Magnesium glycinate 200 mg nightly; Fish oil 1000 mg daily.

Next physical due: February 2027.

Electronically signed by Nathan Gibbs, MD, February 11, 2026
