

United Machinists and Aerospace Workers

Local 1484 Pension Fund

Benefit Estimate

Member: Charles Robert Ferguson

Member number: 1484-2207

Employer: Ridgemont Aerospace

Estimate prepared: February 2, 2026

Dear Mr. Ferguson,

At your request, here is an estimate of your monthly pension benefit at your earliest unreduced retirement age. This is an estimate based on current service and plan rules. It is not a guarantee and it is not advice. Final figures are set at the time you retire.

Service and eligibility

Item	Detail
Continuous service start	1999
Earliest unreduced age	58
Estimated service at age 58	31 years
Vesting status	Fully vested

Estimated monthly benefit

Payment option	Monthly	Annual
Single life	3,800.00	45,600.00
Joint and 75 percent survivor	3,420.00	41,040.00
Joint and 100 percent survivor	3,260.00	39,120.00

The single life option pays the highest monthly amount and stops at your death. The survivor options pay a lower monthly amount but continue to your spouse. Most members with a spouse choose a survivor option.

How the benefit is figured

Your benefit is based on years of credited service and a benefit multiplier set by the plan, applied to your final average earnings. The single life figure above reflects your projected service at age fifty eight. Working past that age can increase service credit. Leaving earlier can reduce the benefit.

What to do next

No action is needed now. When you are within a year of retiring, request a formal benefit calculation in writing. The fund office will then lock the figures and walk you through the option election and the spousal consent forms. Keep this estimate with your retirement file.

Questions

If anything here looks off, especially the service start year, contact the fund office so we can correct the record well before you retire. It is far easier to fix a service date now than during the month you are trying to retire.

Sincerely,

Local 1484 Pension Fund Office
