

Memorial Healthcare System

Cardiology Clinic, Hollywood, Florida

Visit Summary

Patient	Rosemary Bell
Date of Birth	October 22, 1949
Date of Visit	February 10, 2026
Provider	Harold Thompson, MD, Cardiology
Reason for Visit	Hypertension follow-up

Vital Signs

Blood pressure 138/84 mmHg, heart rate 74, weight stable. Repeat reading after rest 134/82 mmHg.

Current Medications

Lisinopril 20 mg once daily. Amlodipine 5 mg once daily. Patient reports occasional missed morning doses.

Assessment

Essential hypertension, fair control. Readings remain above the goal of less than 130/80. No chest pain, no shortness of breath, no edema. Prior echocardiogram showed preserved ejection fraction.

Plan

Continue current medications at present doses. Reinforced sodium reduction and daily adherence with the family. Home blood pressure log to continue, brought today and reviewed. Daughter present and engaged in care planning. Return to clinic in approximately eight months, October 2026, sooner if home readings exceed 150/90 on repeated occasions.

Electronically signed by Harold Thompson, MD. This summary was provided to the patient and authorized family caregiver.
